MisuraEmme®

Price list multiplier
x 1,1

To obtain the price in **€ (euro)** use the points on the price list and multiply them by the above mentioned index. **VAT excluded**
*The multiplier is not valid for products with value expressed in **net price**.*

GENERAL SALES CONDITIONS

- 1

PRICE LIST
This price list invalidates and replaces previous price lists for all intents and purposes.
For shipping costs please refer to the established sales conditions.
Prices do not include project design, shipping to the final buyer's location or installation at the final buyer's location.
The list prices are approximate, only. The final price is the one specified on the order confirmation.
MisuraEmme reserves the right to effect any changes it considers appropriate, at any time and without prior notice.
- 2

CONDITIONS
The delivery dates indicated on the order conformation are only approximate and not binding.
We allow up to 6 days from the date of order confirmation to make changes to orders in progress.
After this time, since we presume that the order has entered the production phase, there will be an additional charge for any modifications: 30% of the amount of those items which have already been manufactured - completely or even partially.
The customer agrees to check the availability of low inventory or discontinued products before placing an order.
- 3

COMPLAINTS AND RETURNS
Any complaint regarding the goods must be received within 6 days from when the goods are received, and must be accompanied by the quality control document included in the package/crate, and pictures showing the source of the complaint.
The customer may return goods only after receiving prior authorisation in writing from MisuraEmme.
The goods must be properly packed and/or crated before being returned.
Returns are not accepted unless expressly authorised in writing and free of charges at our headquarters.
- 4

PACKAGING
Packing in cardboard boxes is included in the price.
Requests for packing in wooden crates will be subject to a 10% surcharge for a minimum net amount of € 300.
Items made of crystal glass and items in marble are packed precisely and reliably.
- 5

TECHNICAL NOTES
The measurements indicated are in mm.
The technical specifications on the price list are approximate and not binding.
Samples of finishes and wood, fabric and leather are not binding and only indicative.
Laquer covers may show variations in shade from one lot to another.
Scars, insect bites, wrinkles and veins are natural characteristics of authentic leather.
These marks are proof that this product is made of real leather, and should not be considered as defects.
It is technically impossible to guarantee that colours will not change over time or vary from one production lot to another.
Over time, the appearance of wood finishes may change due to exposure to light and ageing of the material.
The buyer accepts such tolerances upon order confirmation.
- 6

CUSTOM SIZES
Upon the customer's special request, the company can supply items in custom sizes, which are obtained by reducing one or more dimensions of standard articles.
When this is done, the company reserves the right to apply a surcharge on the listed price, calculated on the basis of the number of cuts made on the product and on the need for completing additional processing according to a technical drawing.
- 7

PAYMENTS
The amount shown on the order confirmation is the amount that must be paid.
Any discounts agreed upon must be specified on the order confirmation.
If a payment is not honoured by the bank, the relative bank fees must be paid by the buyer, and the prices on the price list - and not those agreed upon with the customer - will be applied.
If payments are late, MisuraEmme may ask to be compensated for the damage suffered plus the interest described in Ital. Legis. Decree 231/02. 231/02.
All goods shall remain the property of MisuraEmme until paid for in full.
If goods are sold by buyers to third parties before payment to MisuraEmme, credit rights are intended transferred to MisuraEmme.
- 8

EXCLUSIVE JURISDICTION
The contract is governed by Italian Law.
Any dispute between the parties regarding the interpretation, stipulation, execution and/or validity of the contract will be adjudicated exclusively before the Court of Como, Italy; however, the company may have the right to join the buyer's forum.

It is technically impossible to guarantee that colours will not change over time or vary from one production lot to another on parts in lacquered wood, glass or painted glass. Over time, the appearance of wood finishes may change due to exposure to light and ageing of the material. therefore colour variations should not be considered as defects, but as proof of the use of natural materials and authentic artisan processes.

PALO ALTO FREE programme is the project system evolution according to MisuraEmme concept, to use spaces in utmost and customized way in living and night areas.

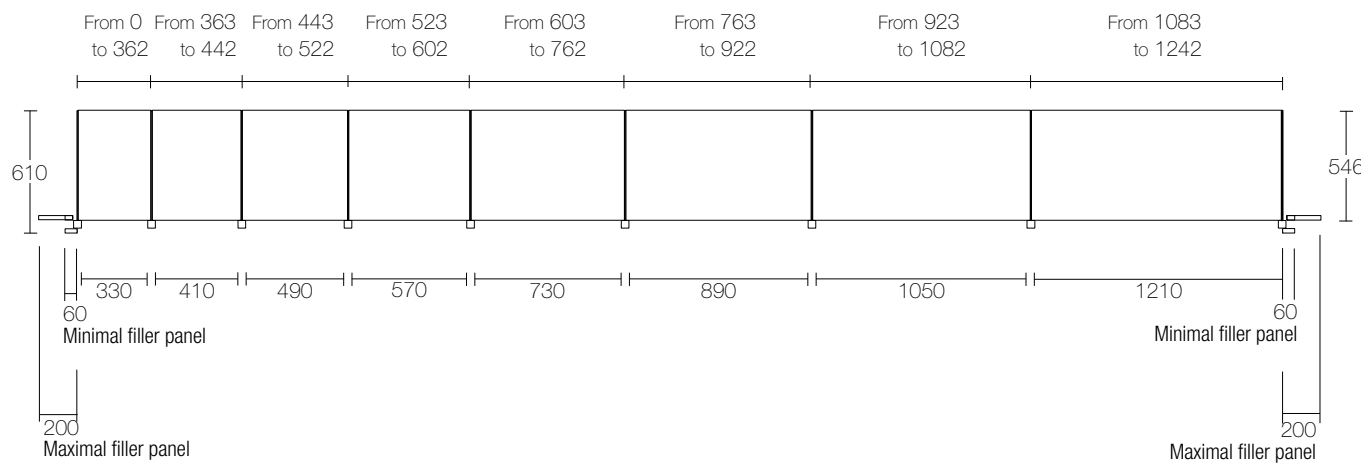

PALO ALTO FREE is a system at load bearing structure changing niches in out and out equipped closets and enables to create specific zones, i.e. walk-in closets, door passage, equipped wall partitions. PALO ALTO FREE versatility makes suitable domestic and professional use.

Load bearing structure requires always side and upper filler panels on front and rear side. Moreover, wooden and glass framed doors can be applied on structure.

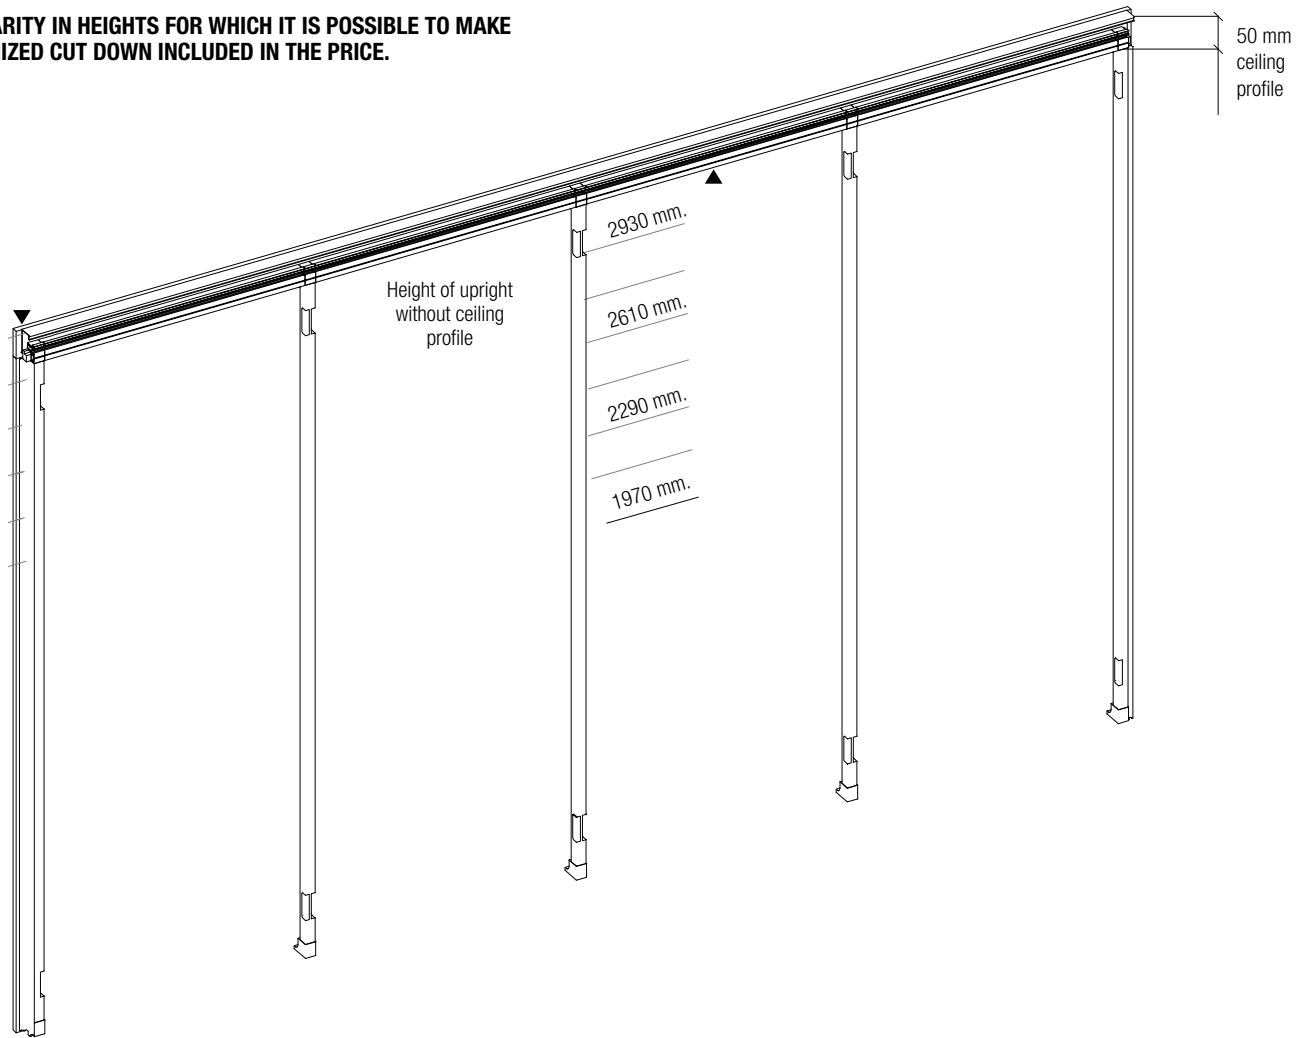

Application of Rex door with "RX6" hinges mechanism through arms apparatus is also possible, designed and produced by MisuraEmme research and development department expressly for PALO ALTO FREE with collaboratin with Domus Omnia studio, to allow the utmost usability of doors compartments.

System provides for specific internal equipment too especially studied to be fitted on load bearing structure uprights; internal side of uprights can be equipped with vertical Led light strips and electrical groove channel transfers electricity to accessories with horizontal lights without using electrical cables.

MODULARITY IN WIDTHS FOR WHICH IT IS POSSIBLE TO MAKE CUSTOMIZED CUT DOWN INCLUDED IN THE PRICE.

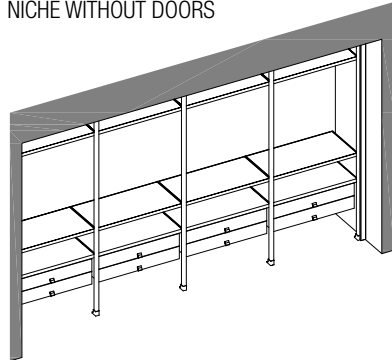

MODULARITY IN HEIGHTS FOR WHICH IT IS POSSIBLE TO MAKE CUSTOMIZED CUT DOWN INCLUDED IN THE PRICE.

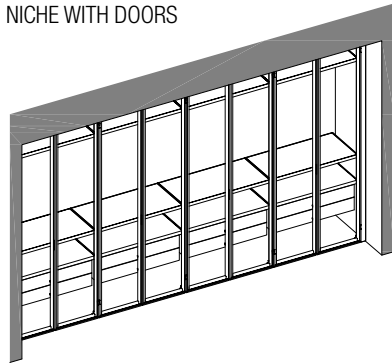

USE

NICHE WITH DOOR PASSAGE AND SIDE EQUIPMENTS

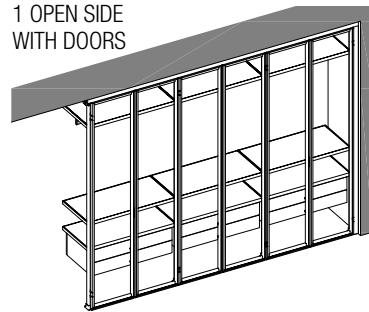

NICHE WITH DOOR PASSAGE

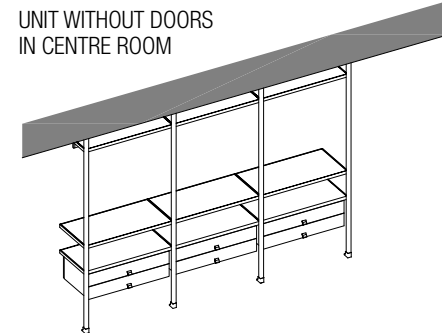

1 OPEN SIDE WITHOUT DOORS

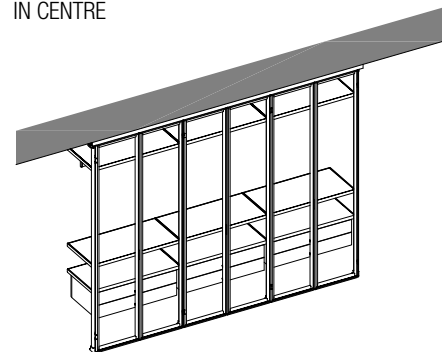

1 OPEN SIDE WITH DOORS

UNIT WITHOUT DOORS IN CENTRE ROOM

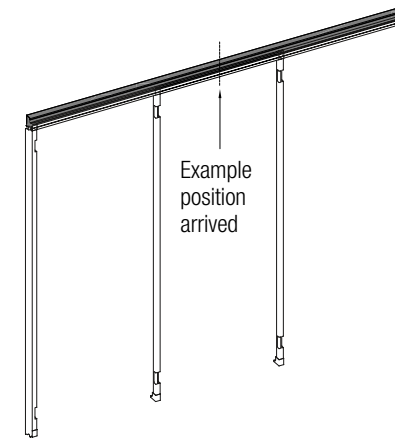

UNIT WITH DOORS IN CENTRE

STRUCTURE

1 Ceiling upper structure trim

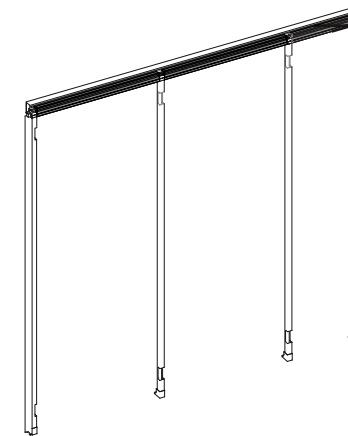

For compositions with ceiling upper structure trim 3000 mm wider please, put more trims near each other. Jointing is always in middle unit (never on upright).

2 Initial - central - end uprights

Uprights equipped with doors with 94° standard hinges or 180° Rex hinges. Option of filler panels for initial and end uprights to finish the composition.

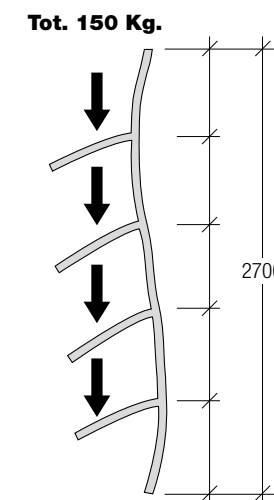

3 Upper crosspiece for single and double doors

According to the project options upper crosspiece can be furnished with:

- Light sensor
- "RX6" hinges mechanism for Rex door patented by MisuraEmme SpA in collaboration with Decoma Design Studio
- Hinge doors are equipped with smove shoke absorber and block magnet to make closing easier, slowly and quiet

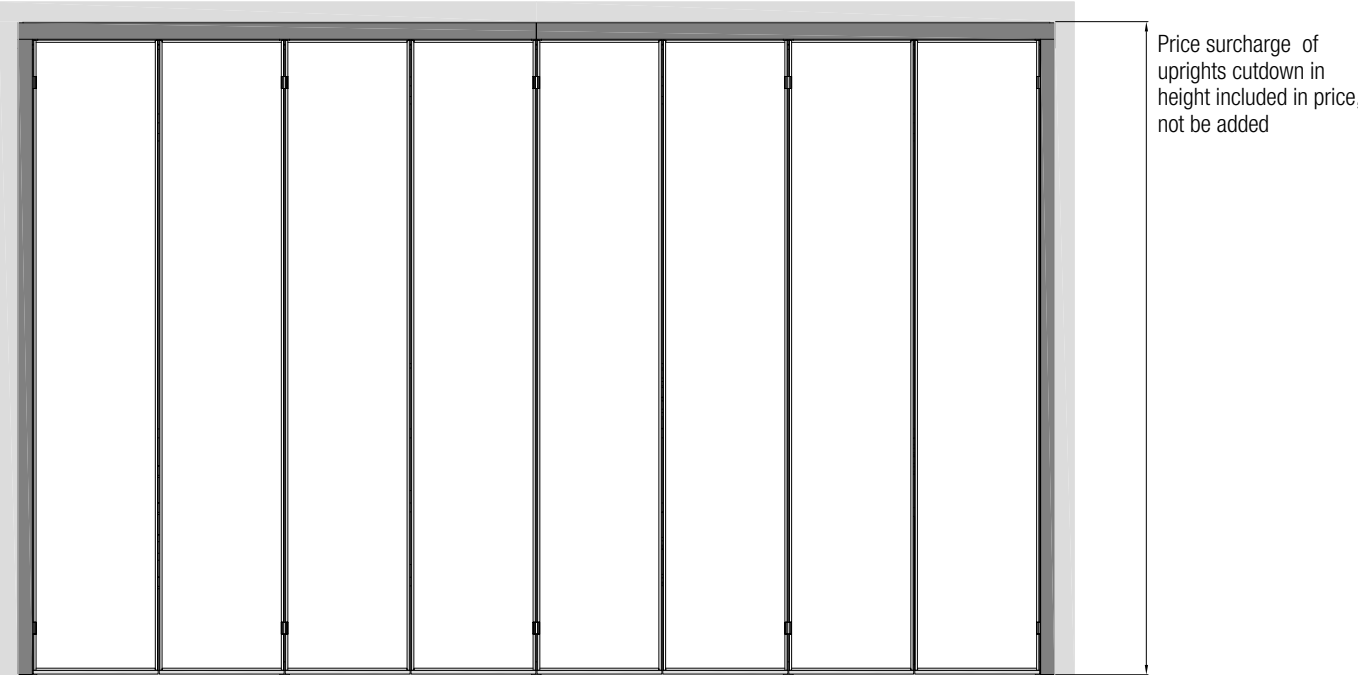

LOADING ANALYSIS

After test, maximum available loading weight 150 kg each upright. The maximum load capacity of a module with two uprights (SX/DX) is therefore a total of 300 kg. To define the usable capacity, the weight of the equipment chosen during the design must be deducted at the maximum capacity of the module.

A wooden shelf L. 1082 x P. 546 weighs 10 kg.
A wooden shelf with bag holder and shirt holder L. 1082 x P. 546 weighs 27 kg.
A suspended chest of drawers with two drawers L. 1082 x P. 546 weighs 36 kg.
A chest of drawers with suspended elements aluminum structure with two drawers L. 1082 x P. 546 weighs 33 kg.

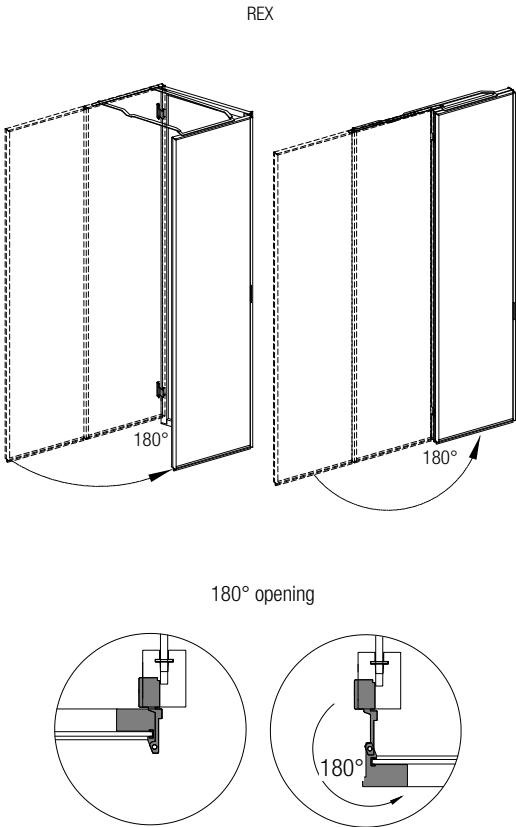

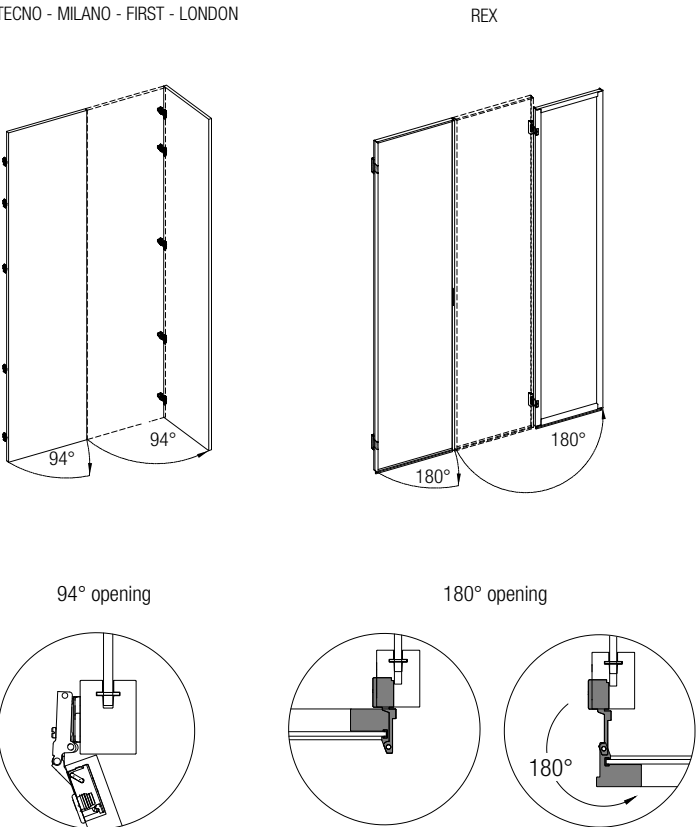

PROJECT OF FRONTS

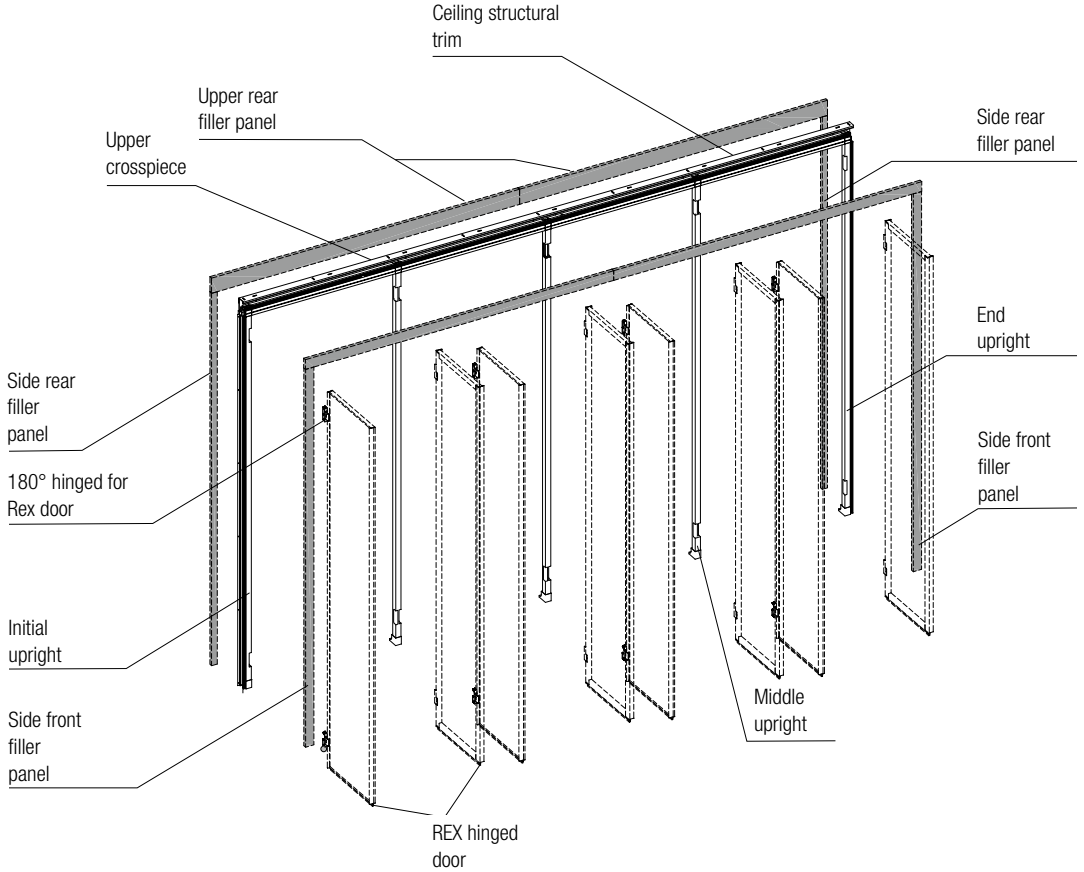

TYPE OF DOORS OPENING

HINGED SYSTEM
reducible in height and width included in the price
with adjustable gasket equipped with synthetic bristles

RX6 OPENING SYSTEM
not reducible in width
with adjustable gasket equipped with synthetic bristles

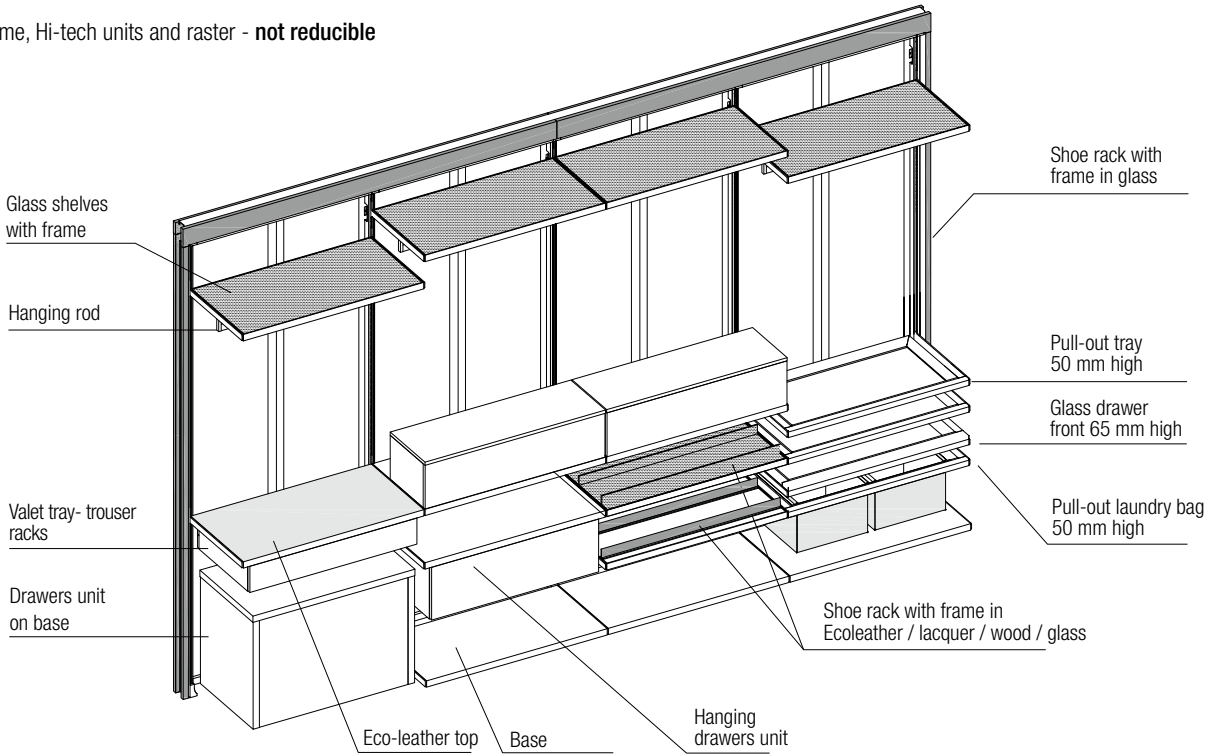

FRONT SIDE

REAR SIDE

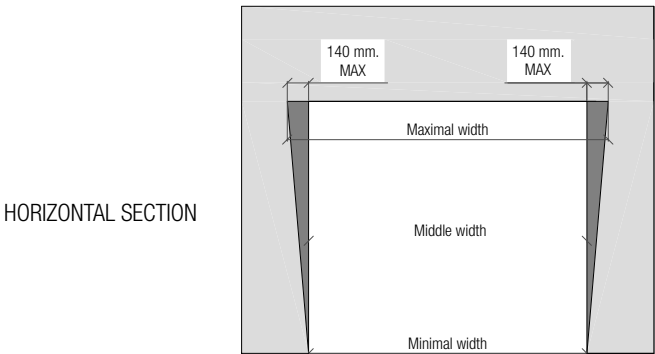

Wooden shelves, wooden bases, hanging rods and maps customizable - **reducible**

Shelves with frame, Hi-tech units and raster - **not reducible**

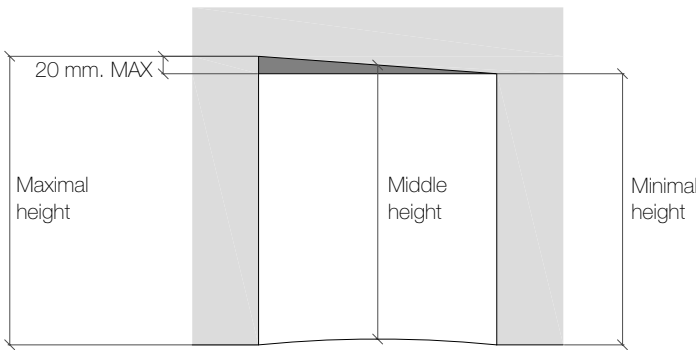

WIDTH SIZES

Measure room width in the various ends. Maximum, minimum and middle width.
To calculate the width of the composition, use for the first variant the width of the vertical filler, add the width of the fillers together, deduct 34 mm and subtract the total result from the minimum room niche size.

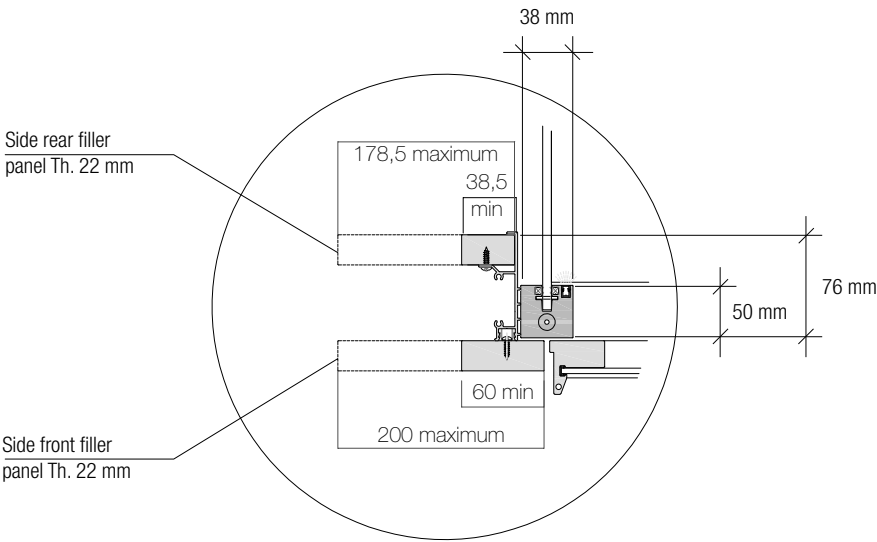

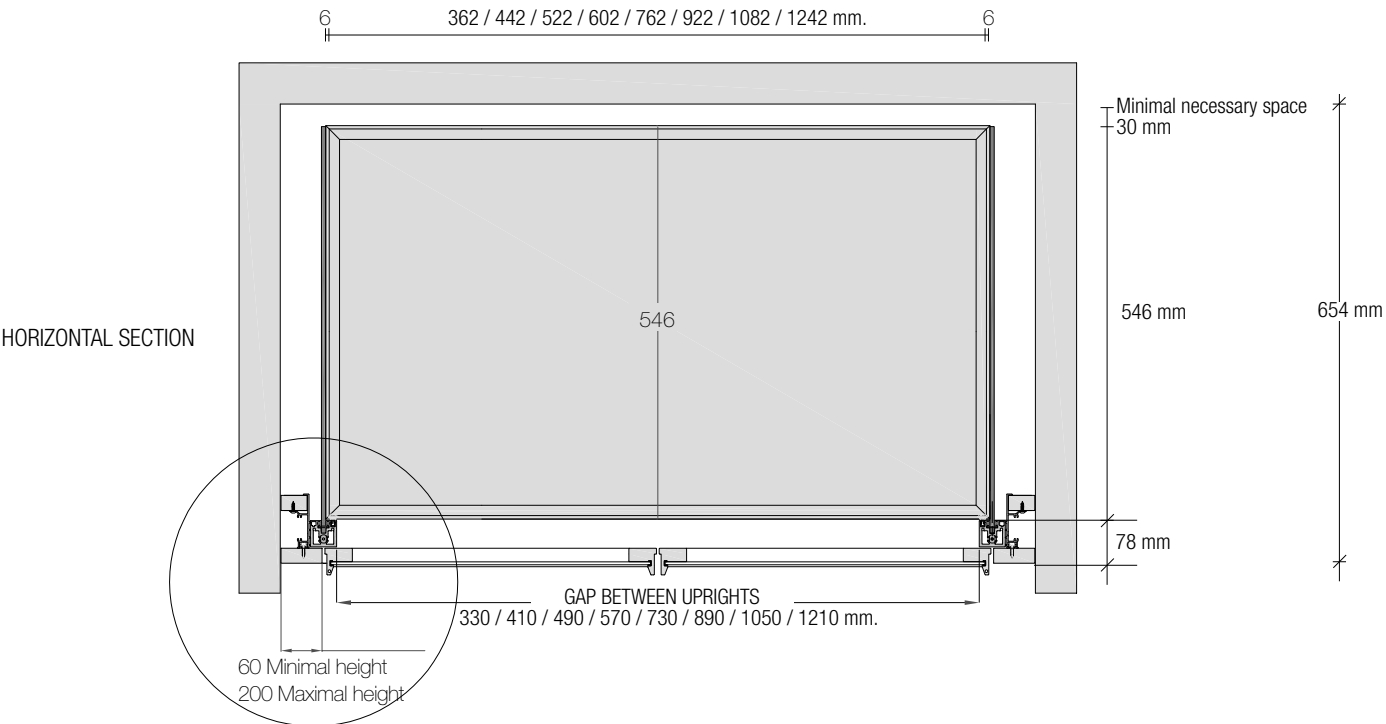

HEIGHT SIZES

Measure room height in the various ends. Maximum, minimum and middle width.
Maximum gap between the highest point and the lowest point 20 mm.
To calculate the height of the upright it is necessary to subtract 50 mm from the lowest height of the niche room.

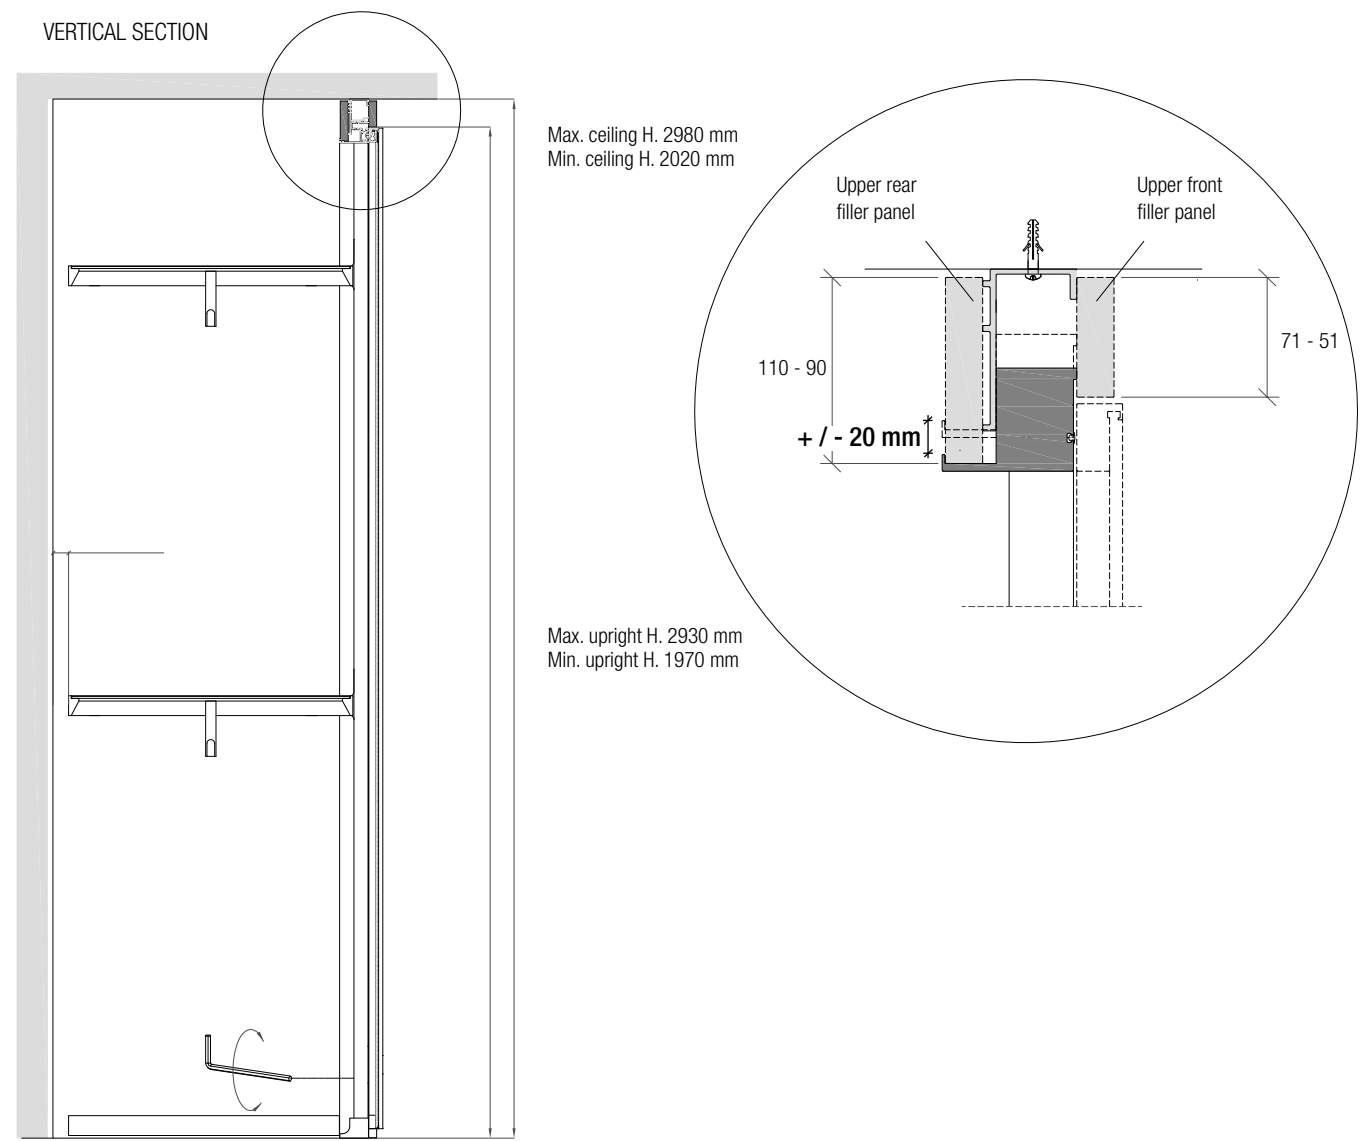

DEPTH SIZING

The minimum depth of the niche to set up Palo Alto Free including equipment is 654 mm.

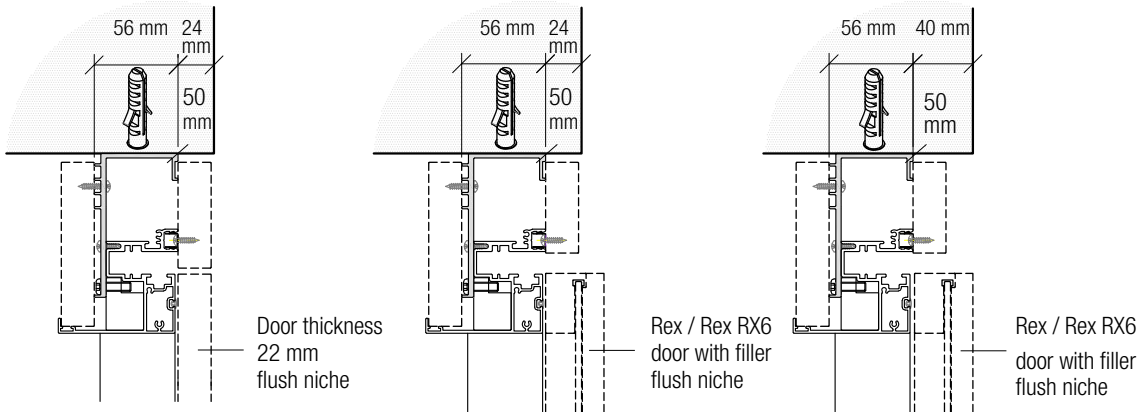

UPPER ADJUSTMENT TO CEILING

The adjustment to ceiling is made through the slot located on the head of the upright.
The maximum ceiling height for using Palo Alto Free is 2980 mm, while the minimum ceiling height is 2042 mm

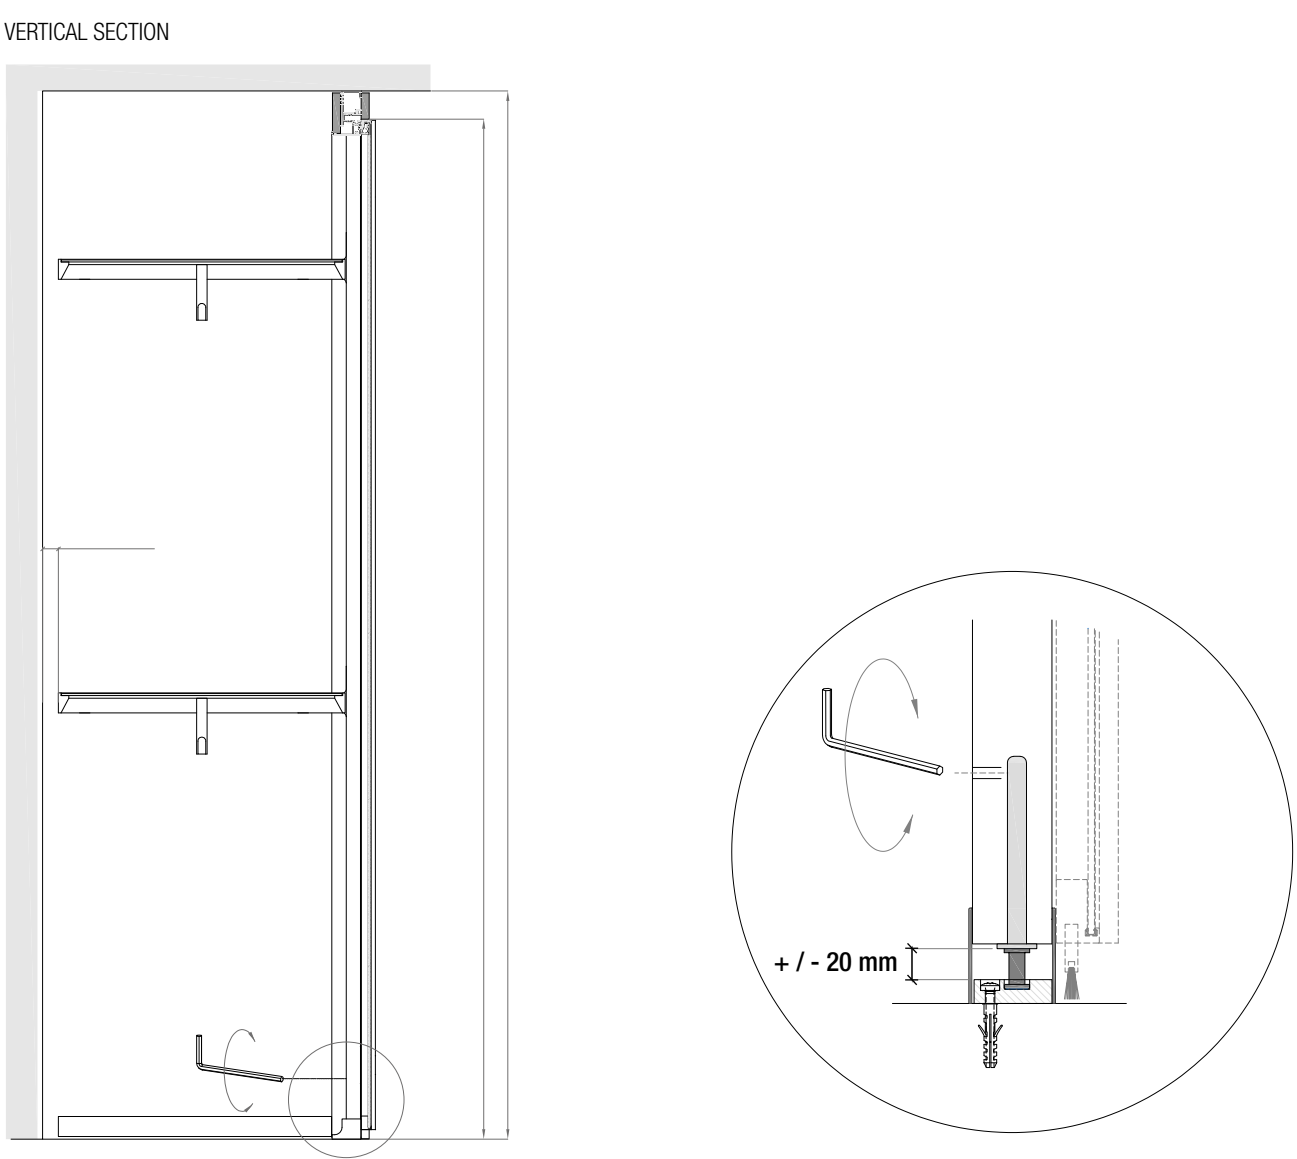

FASTENING TO THE CEILING

Set down the ceiling profile according to the desired aesthetic alignment.
It is necessary to provide reinforced plasterboard with structure suitable for wall plug of minimum 50 mm.

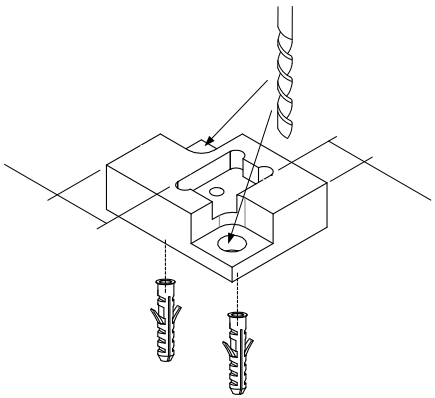

ADJUSTMENT TO BASE

The adjustment to base is made using the foot placed on the base of the upright.

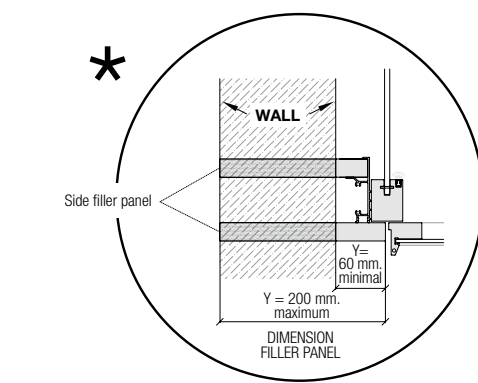

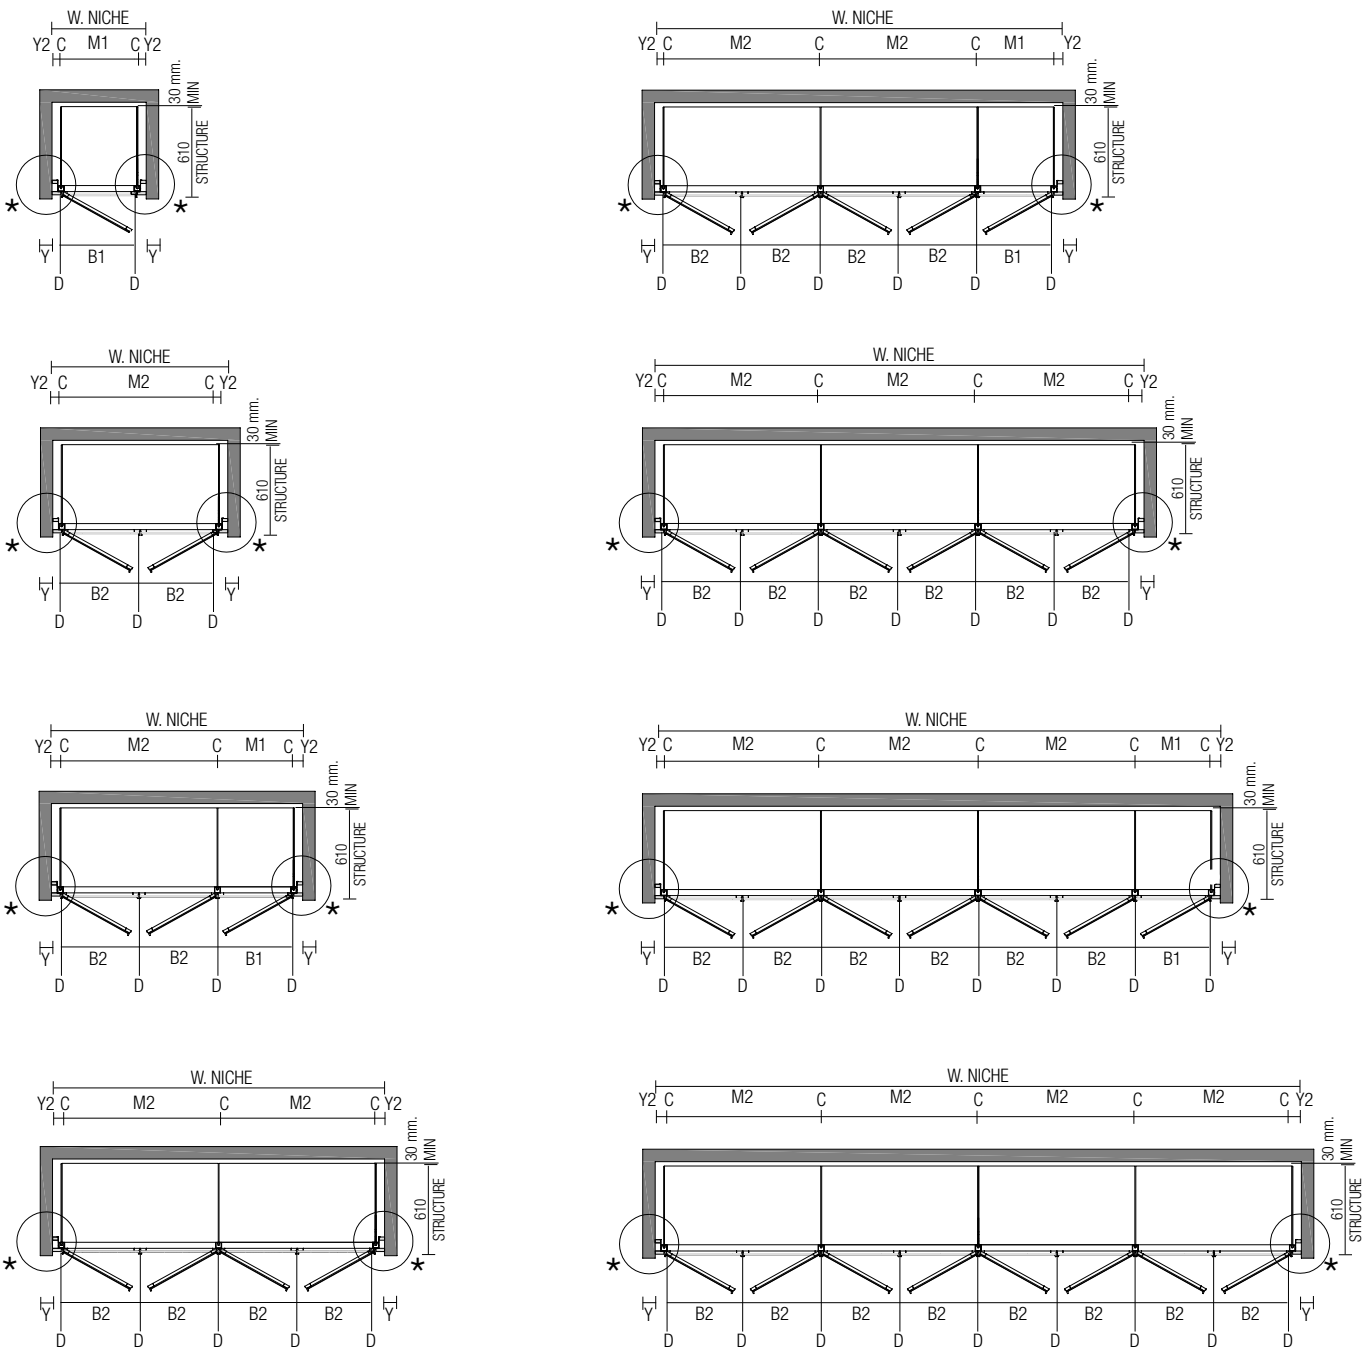

FASTENING TO FLOOR

It is necessary to anchorage the base of upright to floor.
We recommend the use of wall plugs from 30 / 40 mm minimum.

COMPOSITIONS IN NICHE

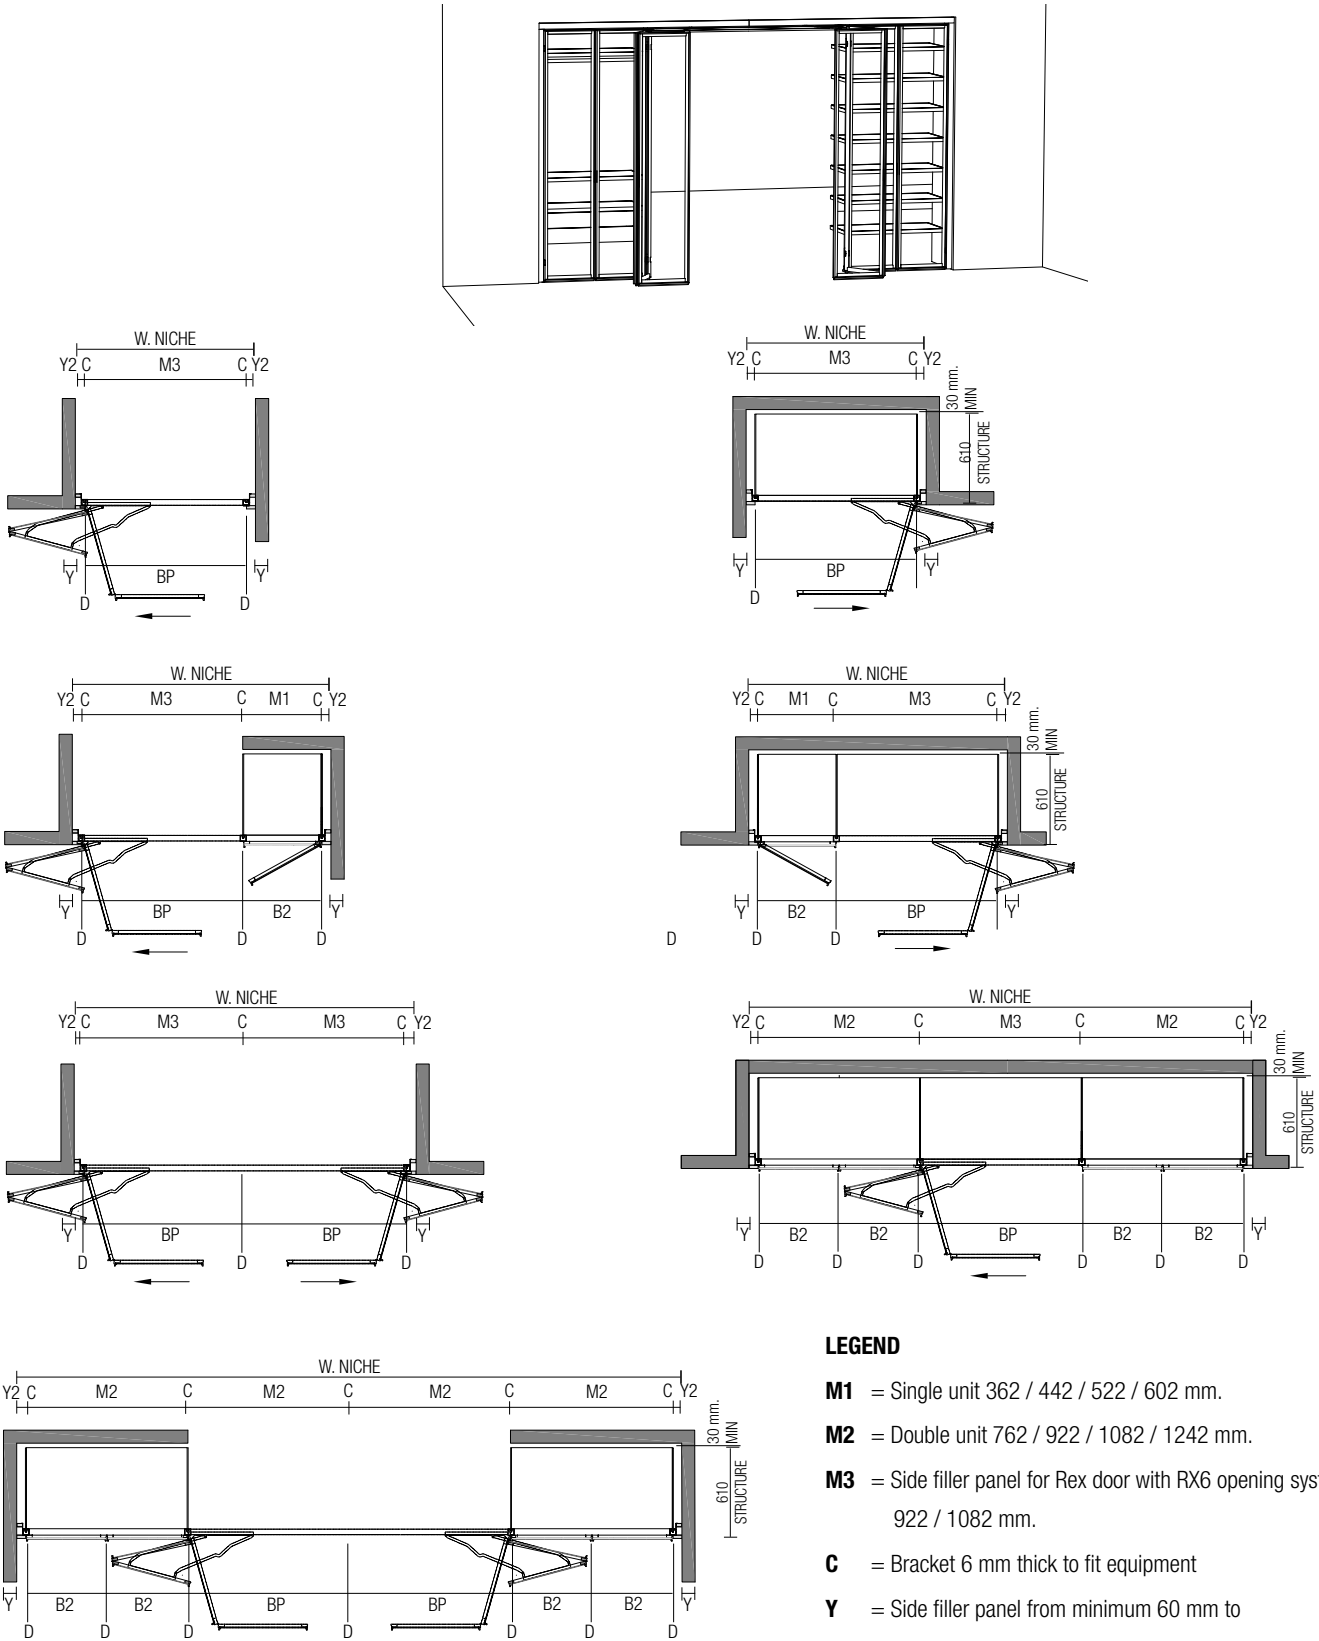

Room width calculation mode for Palo Alto Free within a niche.

- LEGEND**
- M1** = Single unit 362 / 442 / 522 / 602 mm.
 - M2** = Double unit 762 / 922 / 1082 / 1242 mm.
 - C** = Bracket 6 mm thick to fit equipment
 - Y** = Side filler panel from minimum 60 mm to maximum 200 mm.
 - Y2** = Initial front filler panel Y - 1 mm
 - B1** = Door for single unit 364 / 444 / 524 / 604 mm.
 - B2** = Door for double unit 380 / 460 / 540 / 620 mm.
 - D** = 4 mm. gap between hinged doors / filler panel and door

DOOR USE "RX6"

Solution with Rex door with RX6 opening systems enables use of Palo Alto free as door passage and wall partition

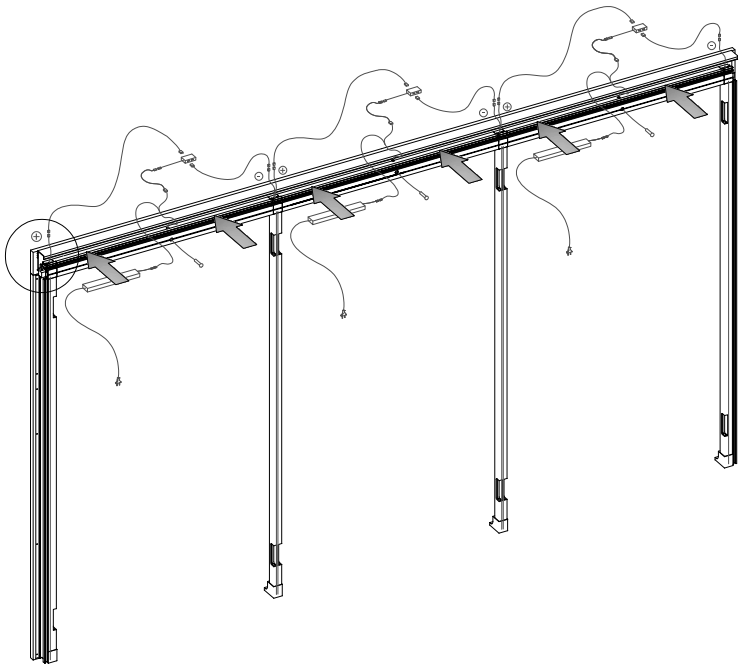

- LEGEND**
- M1** = Single unit 362 / 442 / 522 / 602 mm.
 - M2** = Double unit 762 / 922 / 1082 / 1242 mm.
 - M3** = Side filler panel for Rex door with RX6 opening system 922 / 1082 mm.
 - C** = Bracket 6 mm thick to fit equipment
 - Y** = Side filler panel from minimum 60 mm to maximum 200 mm.
 - Y2** = Initial front filler panel Y - 1 mm
 - B1** = Door for single unit 364 / 444 / 524 / 604 mm.
 - B2** = Door for double unit 380 / 460 / 540 / 620 mm.
 - BP** = Door 964 / 1084 mm.
 - D** = 4 mm. gap between hinged doors / filler panel and door

HORIZONTAL LIGHT SYSTEM

Horizontal light system is composed by LEDs with continuous light applied on internal accessories (shelves, shelves with frame and shoe racks). Electrification is transmitted by support bracket that receives electrical current from rack of inside of upright. Electrical system can work through sensors, remote control or wall sockets. The housing for the transformer is provided behind the upper front filler panel in the dedicated compartment.

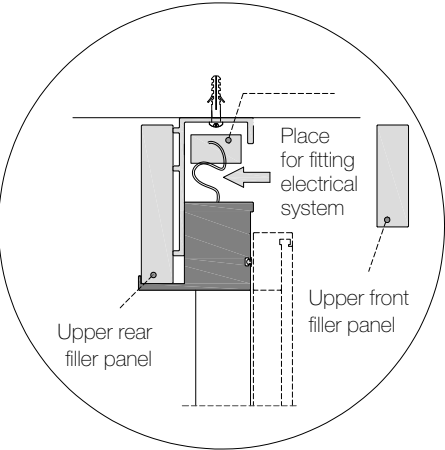

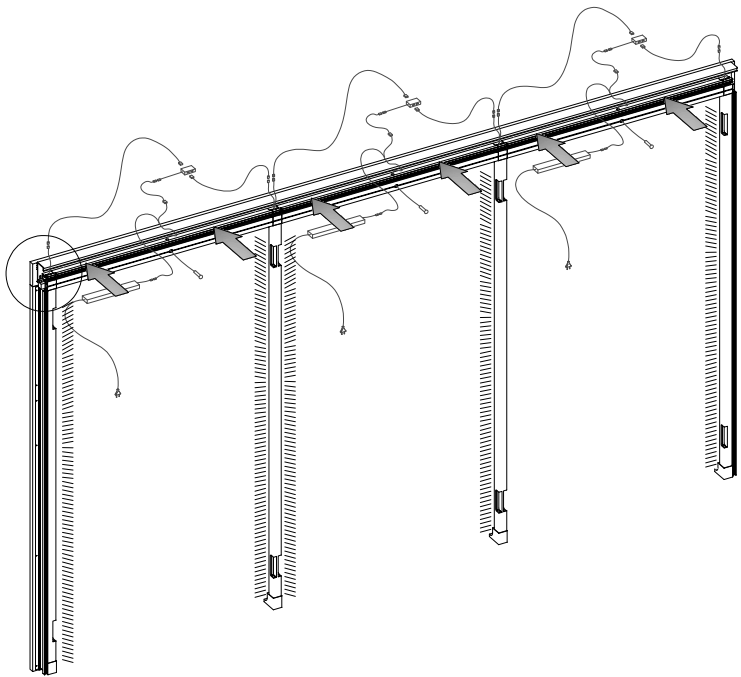

N.B.:
Horizontal electrical system can be added after the assembly changing the type of bracket if the upright is equipped with electrification.

VERTICAL LIGHT SYSTEM

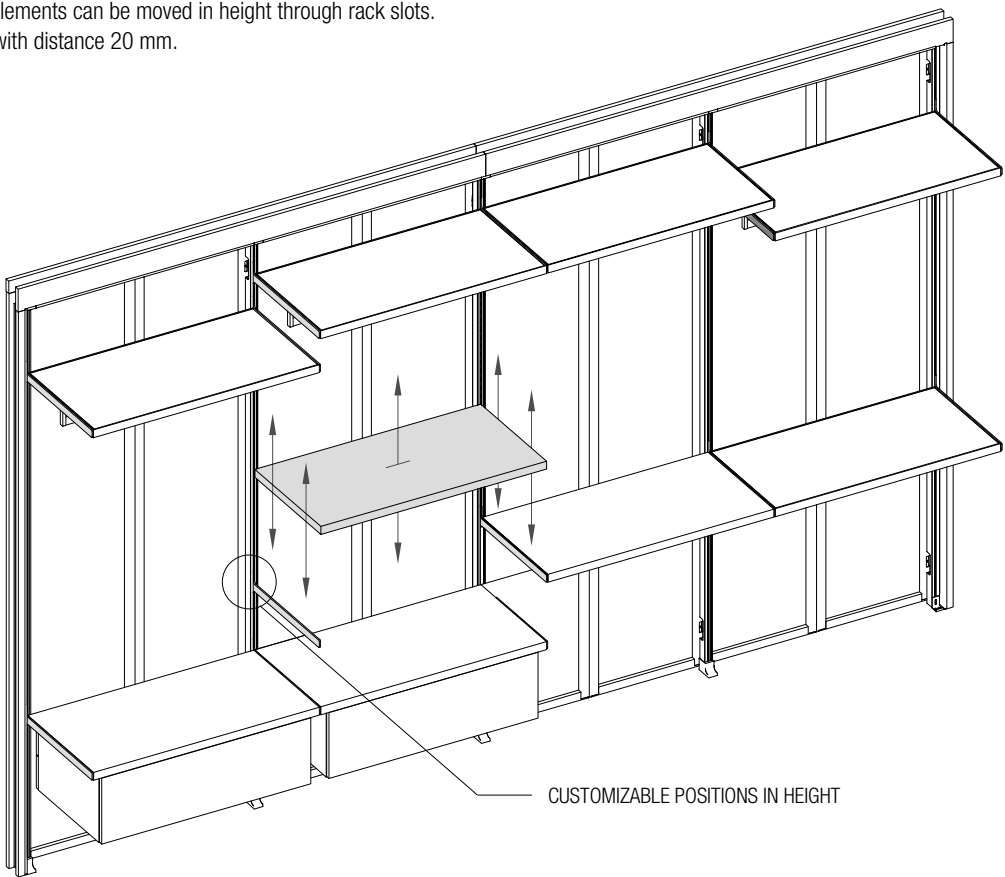

Vertical electrical system is composed by one LED with continuous or punctiform light placed inside initial, middle or end upright. Electrical system can work through sensors, remote control or wall sockets. The housing for the transformer is provided behind the upper front filler panel in the dedicated compartment.

N.B.:
Vertical electrical system can be defined only upon project phase and does not require electrification of upright. For a better lighting of space it is recommended to use two LEDs on the central upright.

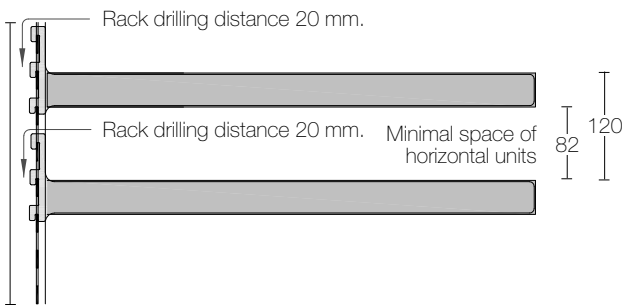

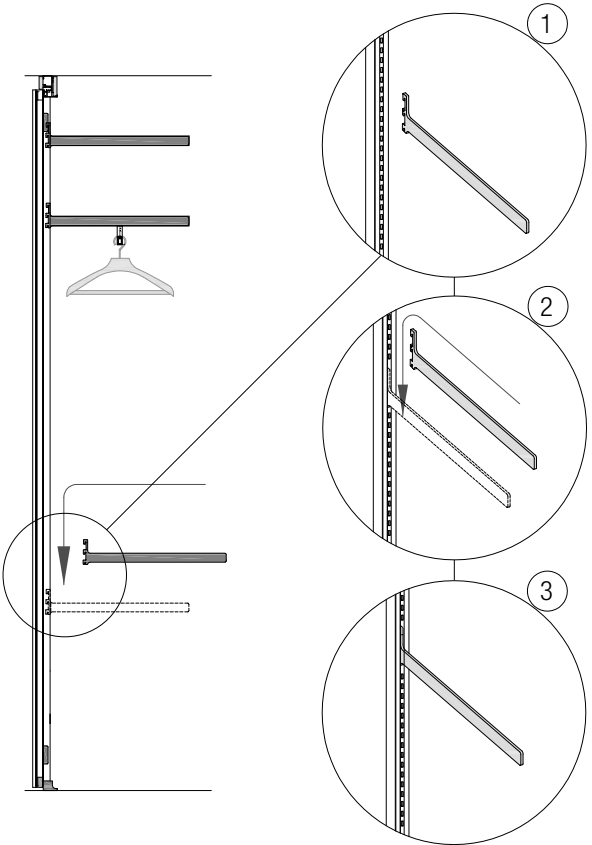

USE OF BRACKETS FOR EQUIPMENT

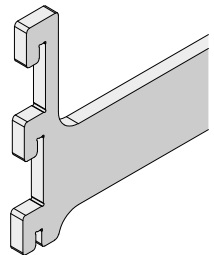

Horizontal internal elements can be moved in height through rack slots, using Rack drilling with distance 20 mm.

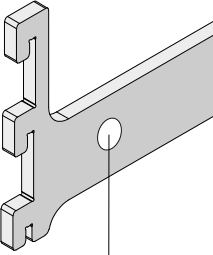

Details bracket hooks (1,2 e 3)

PALO ALTO FREE

BRACKET

The peculiarity of the Palo Alto Free system is determined by the use of metal brackets in finish matched to the supporting structure, fixed through a special rack to the structural upright.

The brackets can be adjusted in height to each 20 mm giving maximum freedom to the design of internal equipment.

The innovative electrification system of the brackets allows to power the horizontal lighting of the equipment, without using electrical wiring, but keeping the plant isolated and certified.

If only vertical lighting is preferred, the bracket does not need electrification.

LED light motion sensor

- The use of motion sensor for switch-on is recommended on hinged, sliding and coplanar cabinets.
- Add a sensor for each individual module.
- For lights mounted on the Palo Alto Free without doors it is not recommended to use the motion sensor for switch-on, it is suggested to use the Remote control or controlled socket.
- The motion sensor can be installed by the glass doors Narcisse, Zeus, Rex too.

CODE	LZSE50
PRICE	156

Radio remote control

- A radio remote control unit is required for each electrical system kit.
- The use of the radio control is recommended on PALO ALTO FREE walk-in closet when it is not possible to wire the switching on the lights with the home system (absence of controlled socket and as an alternative to the sensor on PALO ALTO FREE.
- For the switching on of several lighting systems at the same time with a single remote control or with a single in the home system, consult the company for feasibility.
- Radio remote control with Basic control unit

(for chest of drawers D. 546mm.)

INTERNAL CHEST OF DRAWERS SECTIONS

FINISHED BACK PANEL

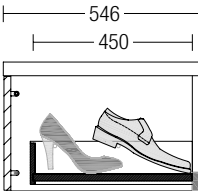

Note: instead of two drawers with N.160 it is possible to position a drawer H.320mm.

STANDARD CHEST OF DRAWERS WITH EXTRACTABLE SHOE RACK TRAY SECTIONS

base chest of drawers - standard
with extractable shoe rack tray

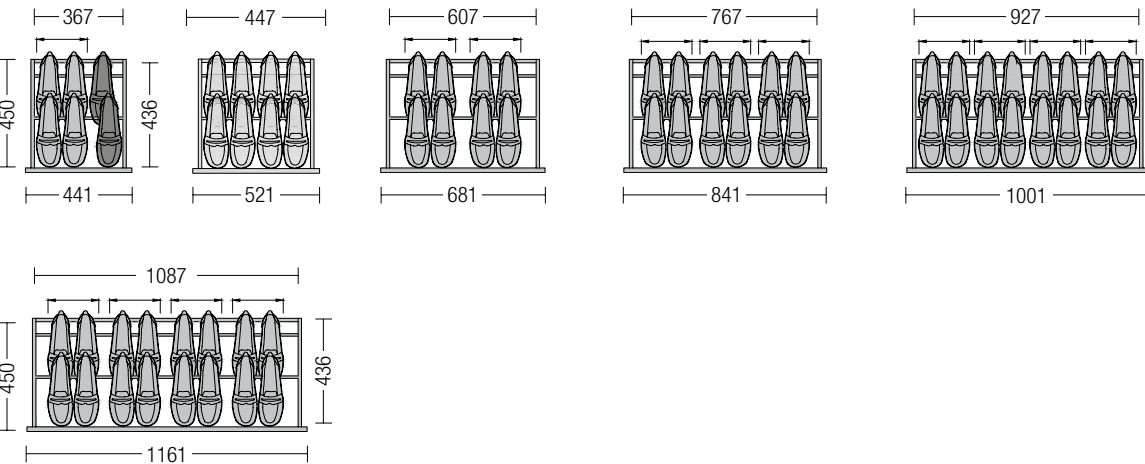

suspended chest of drawers - standard
with extractable shoe rack tray

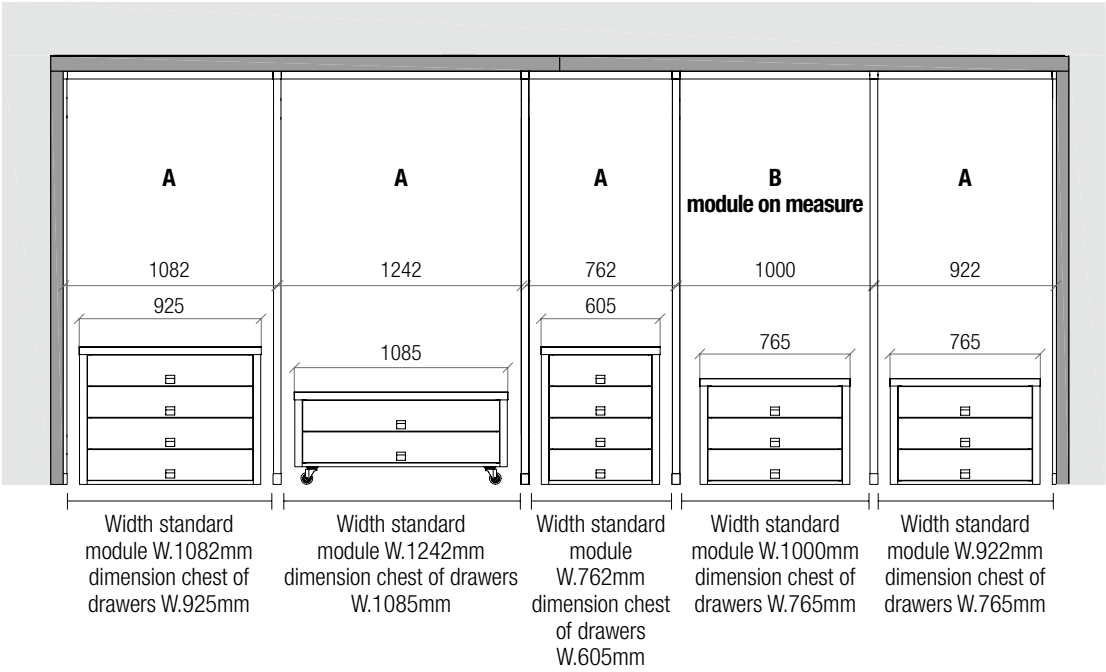

Note: The extractable shoe rack tray can be inserted only in a compartment H.320mm.

SHOE RACK TRAY ORGANISATION (FOR CHEST OF DRAWERS D. 546mm)

BASE CHEST OF DRAWER / WITH WHEELS
RULES HOW TO USE CHEST OF DRAWERS INTO THE MODULES

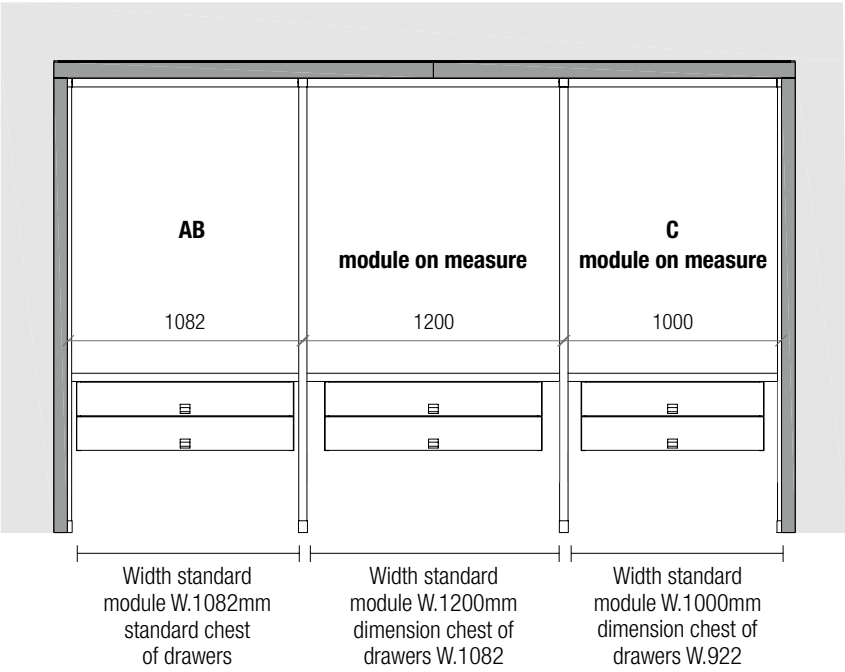

A: Chest of drawer on base fitted into the standard modules should follow the below rules:

- module W.762mm: chest of drawer on base W.605mm
- module W.922mm: chest of drawer on base W.765mm
- module W.1082mm: chest of drawer on base W.925mm
- module W.1242mm: chest of drawer on base W.1085mm

B: Chest of drawer on base fitted into the standard modules should follow the below rules:

- Module on measure (for example W.1000mm) chest of drawers with dimension as per previous standard module (in this case W.765mm)

BASE CHEST OF DRAWER / WITH WHEELS
HANGING CHEST OF DRAWERS

A: Into the module with standard dimension for example W.1082mm use the standard chest of drawers

B: Into the module with wider dimension than the standard, only the top will be customized on measure, while the drawer structure will remain in the standard size W.1082mm.

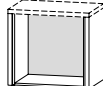

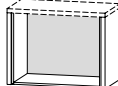

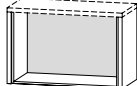

C: Into the module with reduced dimension than the standard, only the top will be customized and reduced on measure, while the drawer structure will be in the standard size of previous measure, in this case W.922mm.
